

## HIGH RISK INFECTION AREA...

Waiting for new building, ward relocation, recurrent contaminations, ...

### DOPAIR® MOBILE AIR RECYCLER

600 to 1500m<sup>3</sup>/h  
HEPA H13 air filtration  
1950mm x 695mm x 695mm - 150kg  
outstanding noise level control 37 dB(A) at 800m<sup>3</sup>/h  
easy to move around thanks to wheels  
operating with standard plug 230V/50Hz

### SELF RECYCLING CEILING WITH LOW AIR FLOW

1 100 to 1 800m<sup>3</sup>/h  
HEPA H14 air filtration  
Air supply by double stretched fabric  
lighting on air supply system  
outstanding noise level control 42dBa to 1100m<sup>3</sup>/h

### CTMP® 2 INTERNAL OR EXTERNAL SECURE TRANSPORT FOR PATIENT

The CTMP® 2 meets hospital internal and external needs for transport. **It operates both under negative and positive pressure, allowing both patient and external environment protection** from any cross contamination that could occur during transfers. It also allows a constant medical check up on the patient and a good protection against medical equipment's contamination
